Business Classification For Marketing Assistance

Unless you are a manufacturer, classification under a specific business type and/or within a specific industry is not a certification requirement. However, to help potential business partners and contracting officials find your firm in our Internet Certified Firm Listing, include your business specialties in your small business certification profile. Enter your 4-digit Standard Industrial Classification (SIC) Code and corresponding SIC code description in the space(s) below. For a complete list of SIC codes, visit our website at www.dgs.ca.gov/osbcr, or call our office at (916) 375-4940. You may detach and mail this portion later to: Office of Small Business Certification and Resources, P.O. Box 989052, West Sacramento, CA 95798-9052.

If you are a construction firm, you do not have to list any classification codes. Construction firms are automatically classified by their current license classification codes that are on file with the Contractors State License Board (CSLB). We verify your contractor's license status directly with the CSLB, and only list the classification codes that are valid at the time of certification.
